A Strategic Planning Perspective

Victor H. Reis Senior Advisor

Office of Undersecretary for Science U.S. Department of Energy victor.reis@science.doe.gov

President Obama State of the Union January 25, 2011

Newton

Lavoisier

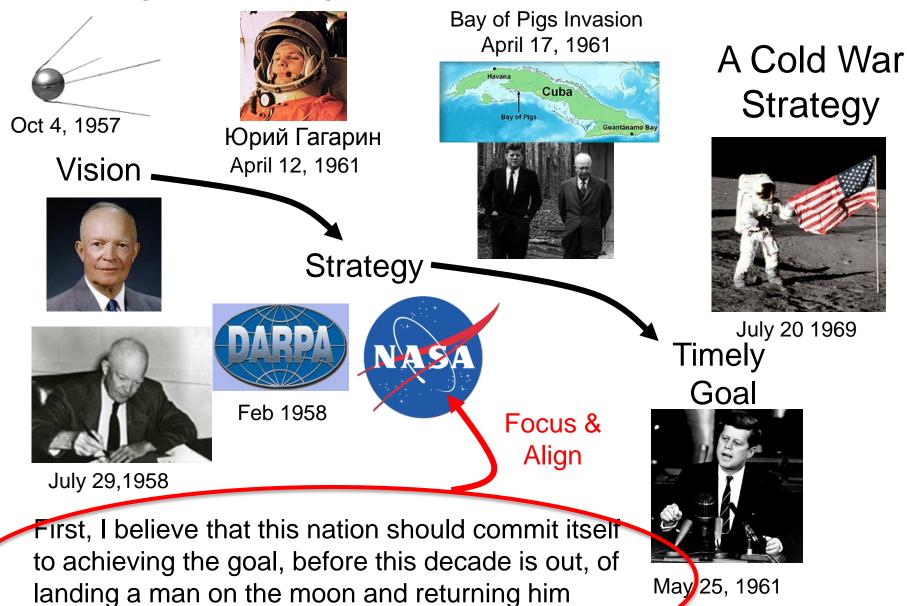

"Half a century ago, when the Soviets beat us into space with the launch of a satellite called Sputnik, we had no idea how we would beat them to the moon.

The science wasn't even there yet. NASA didn't exist. But after investing in better research and education, we didn't just surpass the Soviets; we unleashed a wave of innovation that created new industries and millions of new jobs. This is our generation's Sputnik moment."

"Some folks want wind and solar. Others want nuclear, clean coal and natural gas. To meet this goal, we will need them all -- and I urge Democrats and Republicans to work together to make it happen."

"We're telling America's scientists and engineers that if they assemble teams of the best minds in their fields, and focus on the hardest problems in clean energy, we'll fund the Apollo Projects of our time."

A Strategic Planning Perspective: Sputnik & Apollo

safely to the earth.

Maintain Nuclear Deterrence Without Nuclear Testing: (Science Based) Stockpile Stewardship

To assure that our nuclear deterrent remains unquestioned under a test ban, we will explore other means of maintaining our confidence in the safety, the reliability, and the performance of our own weapons.

MESA

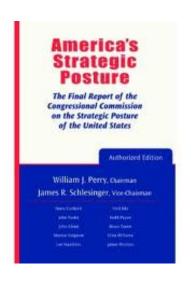

APT/DAHRT

Change from Test to Simulation: Stockpile Stewardship

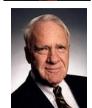

"The Stockpile Stewardship Program has been a remarkable success, much more than originally expected." America's Strategic Posture: Final Report of the Congressional Commission on the Strategic Posture of the United States. William Perry (Chairman) & James Schlesinger (Vice Chairman), 2009

Elements of "Success"

- •U.S. Government "owned" the whole problem
 - Well Defined
 - Quantitative goals
- Alignment of Relevant Institutions/Leadership
 - Presidential Urgency
 - World class Labs
 - Commercial Spin-off
 - Top Computer Companies
 - DoD Partner
- Sustained Sufficient Funding
 - Executive
 - Congress

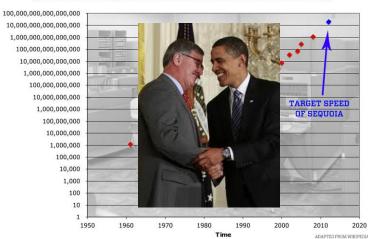

Changed the Game in HPC Commercial MPP

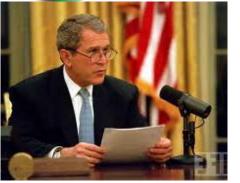

<u>Civil Nuclear Power Leadership:</u> <u>Global Nuclear Energy Partnership: GNEP</u>

....my Administration has announced a bold new proposal called the **Global Nuclear Energy Partnership**. Under this partnership, America will work with nations that have advanced civilian nuclear energy programs, such as France, Japan, and Russia. Together, we will develop and deploy innovative, advanced reactors and new methods to recycle spent nuclear fuel.

Secretary Chu on Small Modular Reactors

- "one of the most promising areas is small modular reactors (SMRs). If we can develop this technology in the U.S. and build these reactors with American workers, we will have a key competitive edge. Small modular reactors would be less than one-third the size of current plants. They have compact designs and could be made in factories and transported to sites by truck or rail. SMRs would be ready to "plug and play" upon arrival.
- •If commercially successful, SMRs would significantly expand the options for nuclear power and its applications. Their small size makes them suitable to small electric grids so they are a good option for locations that cannot accommodate large-scale plants. The modular construction process would make them more affordable by reducing capital costs and construction times.
- •Their size would also increase flexibility for utilities since they could add units as demand changes, or use them for on-site replacement of aging fossil fuel plants. Some of the designs for SMRs use little or no water for cooling, which would reduce their environmental impact."

Steven Chu, Wall Street Journal, March 23, 2010

(LEU Fueled Light Water) Small Modular Reactors

Potential for increasing the rate of introduction of ultra-safe affordable nuclear power in time to meet clean energy goals

- Potential LEU/LW Designs /Concepts
 - mPower 160 MW(e) [x4] B&W+ Bechtel
 - NuScale 45 MW(e) [x12] + Newport News + Electric Boat + Fluor...
 - Westinghouse 200 MW(e)
 - Holtec 140 MW(e)

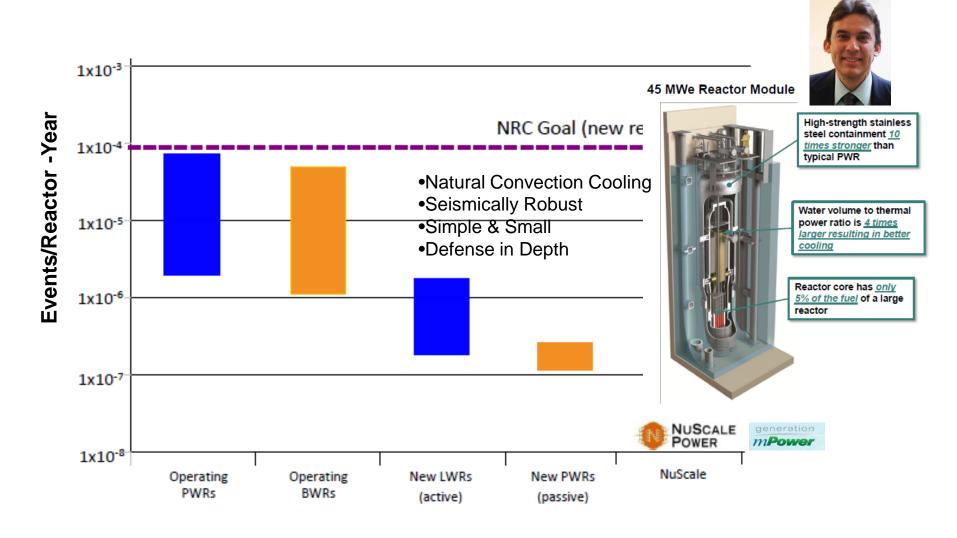

U.S Industrial & Regulatory Base

- Commercial (LWR,LEU) fuel
- Factory Built Modules ["learning vs. economy of scale"]
 - Potential High Throughput
 - Quality Control
 - U.S. Navy Industrial base
- NRC Licensable LWR, LEU fuel, Safety, Security
- Lower early utility capital costs reduce utility financial risk.
 - (1-3)\$B vs \$10B

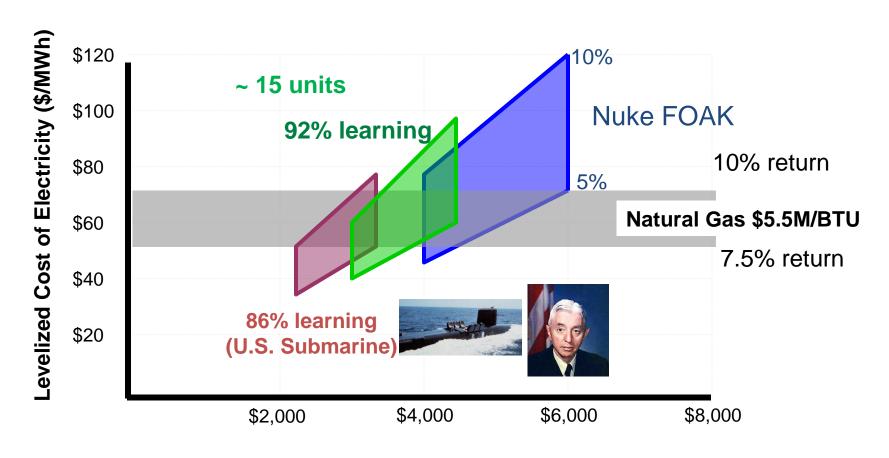

Game Changer

Safety Estimates for SMR

Probabilistic Risk Assessment (PRA) of Core Damage Frequency (CDF)

Can SMR's Compete with Natural Gas?: Effect of Manufacturing "Learning"

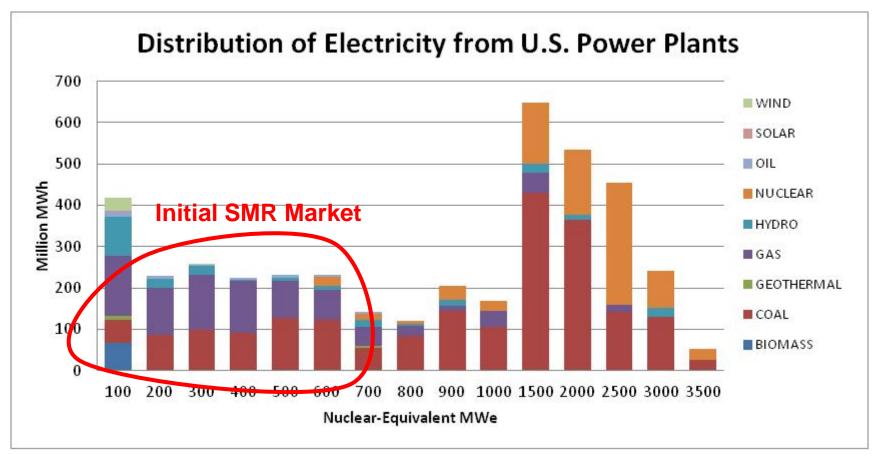

Nuke Overnight Cost (\$/kW)

Potential Initial U.S. Market for SMR

"Their size would also increase flexibility for utilities since they could add units as demand changes, or use them for on-site replacement of aging fossil fuel plants." S. Chu Wall Street Journal

FY 2012 Budget

Small Modular Reactor Licensing Technical Support.

-The conference agreement includes \$67,000,000 to provide licensing and first-of-a-kind engineering support for small modular reactor designs that can be deployed expeditiously, to be administered as specified in the budget request. The Department is directed to consider applications utilizing any small modular reactor technologies. The conferees expect the program to total \$452,000,000 over five years.

Approach ~ DOE Nuclear Energy "Nuclear Power 2010"

- Instrumental in getting AP1000 certified and licensed
 - ABWR ESBWR
 - Cost share with vendors/utilities (50/50)
- FOA January 23, 2012; Selection by end of FY.

Elements of a U.S Civil Nuclear Strategy

1. Rapid Growth of Affordable, Ultra-Safe, Nuclear Power - (SMR)

2. Resolve Spent Fuel issue

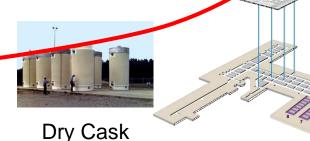

- 3. Lead Global Non-Proliferation
 - Global Market Share
 - Safeguards (SMR -> LWR,LEU)
 - Fuel Leasing

"And we should build a new framework for civil nuclear cooperation, including an international fuel bank, so that countries can access peaceful power without increasing the risks of proliferation."

Salt Repository

Pres Bush NDU Speech: New Measures to Counter WMD, 2/11/04

The world's leading nuclear exporters should ensure that states have reliable access at reasonable cost to fuel for civilian reactors, so long as those states renounce enrichment and reprocessing

Small Modular Reactors for Civil Nuclear Power Leadership

"We must harness the power of nuclear energy on behalf of our efforts to combat climate change, and to advance peace opportunity for all people."

Prague, April 2009
